## Introduction

---

### Description

Don't worry if somebody took your device when you are not nearby. Set a password for launch of the selected applications. So now it is impossible to open protected applications without entering the password. Improve protection of your data with PearBlockIt!

### Features

- Password setting for the launch of the selected applications
- Prevention of the protected applications remove
- **Quick search feature**
- User-friendly interface

### System requirements

- Supports all handhelds running Palm OS 5.0 or later.
- Supports Hi-Res (320x320), Hi-Res Plus Portrait (320x480) and Landscape (480x320) mode displays.
- Supports 1/2/4/8/16-bit displays.

## Installation

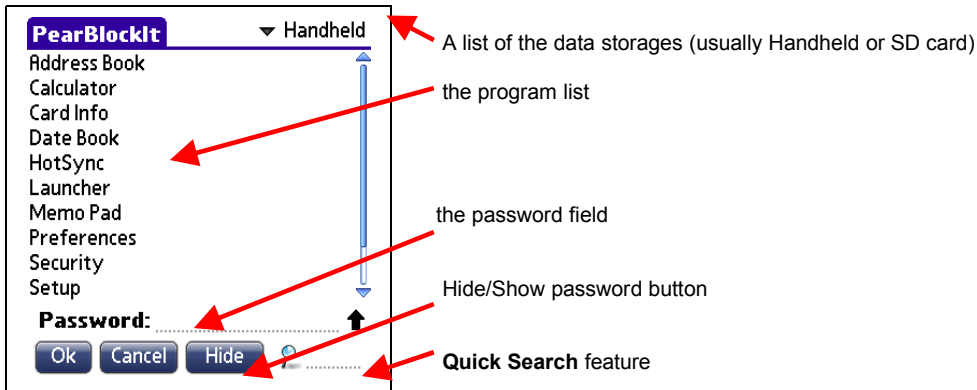

---

To install PearBlockIt, please, synchronize "PearBlockIt.prc" using your HotSync program. If you have installed the application without use of the HotSync program, then, please, make a soft reset.

## Interface

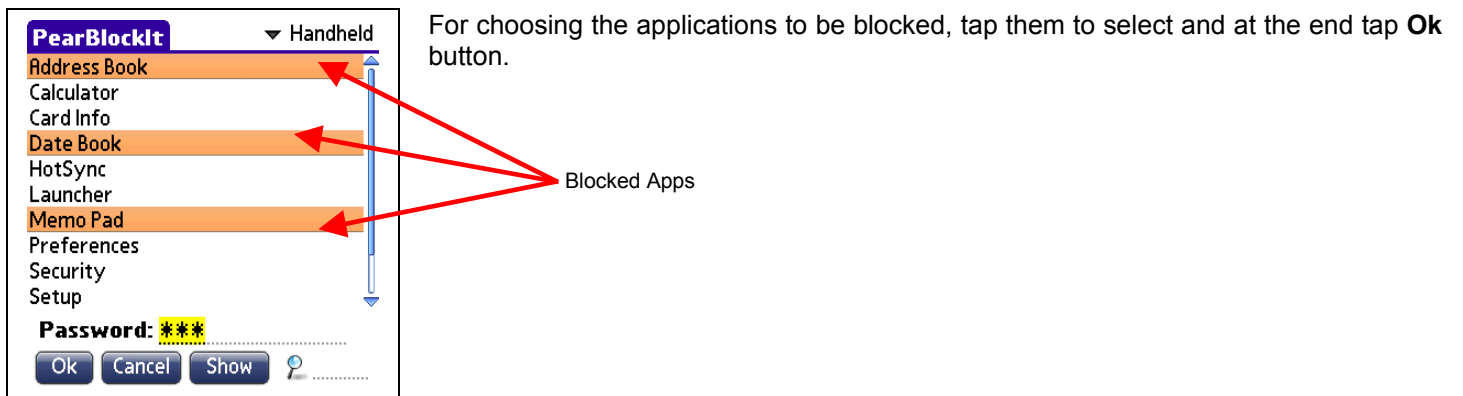

---

The application was created for the fast and comfortable work. So let's take a look at the main control elements.

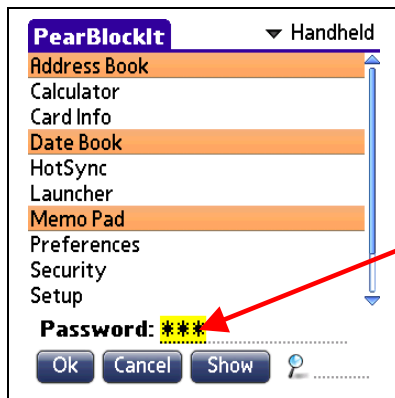

## How to select applications you want to be blocked

---

## How to set/change password for the launch of the applications

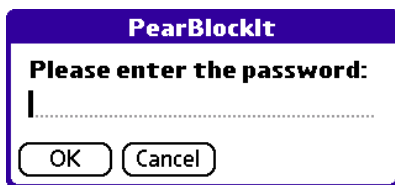

To set the password for the launch of the applications you should input it in the field **Password**, and then tap **Ok** button. From this moment at the time of the launch of the selected applications you'll be invited to input the password or in an another case exit the program.

Password field

\* Be attentive that you should enter the same password when you launch PearBlockIt or the blocked applications

## Launch of the blocked applications

Every time when you launch a blocked application you should input the password (which was set in PearBlockIt) or in another case exit the program.

## About window

**About** window shows where you can buy the application. Product **Homepage** is also presented there. Tap the **Register** button to open the **Registration** window where you can enter the registration code. You'll receive the registration code after you purchase the product.

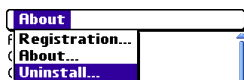

## Registration window

You can purchase the application here: <http://www.pearmobile.com/>.

Once you purchase **PearBlockIt** the registration code will be e-mailed to you. After you receive it you should enter it in the **Registration** window. To open this window, you should tap 'Registration' in **System Menu**.

## How to uninstall the program

To remove the program you should choose menu item **Uninstall** in the PearBlockIt program menu. After that you can delete it from the handheld using the standard system means.

Note! All minor updates are free of charge for registered customers!

Free usage of **PearBlockIt** is limited by 14 days.

You can purchase it here:
